Consultez notre site www.fluiconnecto.com

Fluiconnecto est la division en charge de la distribution des produits Manuli.
Déjà présente dans de nombreux pays, Fluiconnecto poursuit son implantation mondiale.

Fluiconnecto distribue la gamme de tuyaux et raccords hydrauliques Manuli, en proposant des produits à la carte, répondant aux besoins de tous secteurs d'activité (Agricole, BTP, Industries, Marine, Levage, Assainissement, ...).

Spécialiste du transfert de tous fluides (air, gaz, huile, eau, ...), Fluiconnecto s'efforce d'apporter une solution globale à la problématique de ses clients, en leur offrant une large gamme de produits indispensables au bon fonctionnement de toutes installations hydrauliques ou industrielles.

Sont présentés ici les raccords à bague, tubes et colliers, utilisés pour toutes installations rigides.

Les raccords à bague

Ces pièces mécaniques sont destinées :

- à réunir deux ou plusieurs tubes entre eux
- à réaliser une liaison entre un tube et une implantation filetée d'une installation

L'étanchéité est assurée par une bague "taillante".

Les différentes séries :

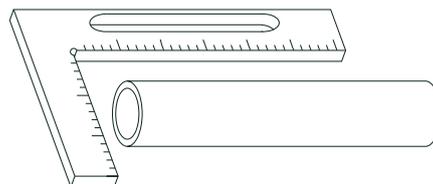

- **LL** : **très légère** (française), utilisée pour des installations à pressions faibles, 100 bar maxi.
- **L** : **légère** (allemande), utilisée pour des installations à pressions moyennes ou faibles, 315 bar maxi.
- **N** : **normale** (française), utilisée pour des installations à pressions moyennes ou fortes, 400 bar maxi.
- **Gaz** : **Gaz** (française), utilisée pour des installations à pressions moyennes ou fortes, 400 bar maxi.
- **S** : **forte** (allemande), utilisée pour des installations jusqu'à une pression de 630 bar maxi.

Selon les séries, les raccords à bague sont **disponibles en acier et inox**

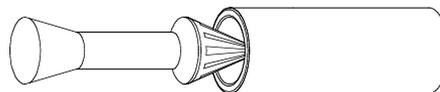

Montage d'un raccord à bague :

Préparation

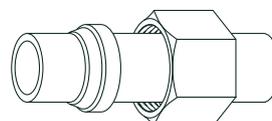

1/ Couper le tube à l'équerre

2/ Ebavurer pour permettre le bon engagement de la bague sur le tube et limiter les pollutions du circuit.

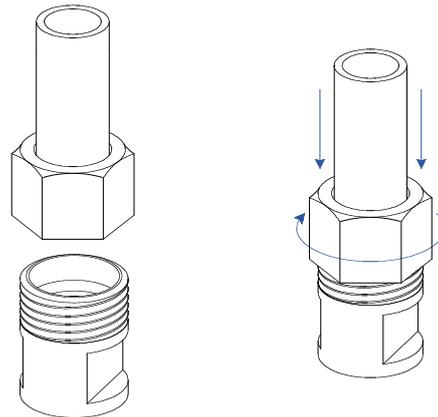

3/ Huiler toutes les parties.
Monter l'écrou sur le tube puis la bague, son arête vive dirigée côté extrémité du tube.

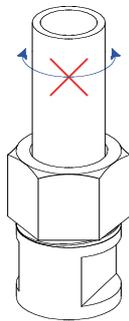

Assemblage

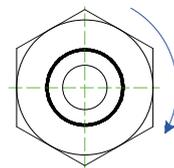

4/ Pousser le tube en butée au fond du corps du bloc de pré-sertissage ou de la pièce réceptrice. Visser l'écrou jusqu'au blocage manuel.

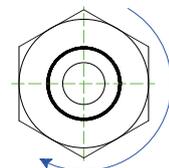

5/ Continuer le serrage de l'écrou jusqu'à l'immobilisation du tube en rotation.

6/ Repérer la position de l'écrou et terminer son serrage en effectuant un pré-assemblage de 1/4 à 1/2 tour maximum.

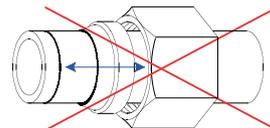

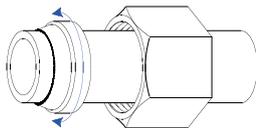

1/4 de tour

1/2 de tour

Contrôle visuel après démontage

7/ Vérifier visuellement la position de la lèvre non coupante en appui sur le bourrelet du tube refoulé. Le bourrelet doit être constant sur toute la périphérie.

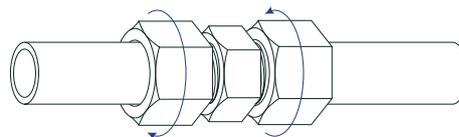

La bague peut tourner autour du tube mais ne doit, en aucun cas, avoir de mouvement longitudinal.

Montage final sur l'équipement

8/ Assembler les pièces, serrer l'écrou jusqu'au blocage manuel, terminer le serrage à la clé :

Séries L et N
Série S

1/2 tour
3/4 de tour

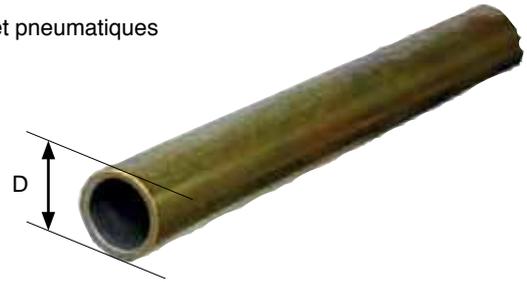

ou selon le couple de serrage préconisé, en utilisant une clé dynamométrique.

Pour connaître la série du raccord à bague, lire sa dénomination dans la partie catalogue.

Les tubes

Ils sont utilisés comme conduits rigides dans les installations hydrauliques et pneumatiques dont les pressions nominales vont de 16 à 800 bar.
Le diamètre de référence est le diamètre extérieur (D).

Description

Les tubes sont sans soudure, étirés à froid, et ont subi un recuit de normalisation en atmosphère contrôlée qui leur confère un état normalisé (NBK par référence à la norme EN 10 305-4).
Les tubes en acier Tu 37 B selon EN 10305-4 sont garantis cintrables à un rayon minimum ou égal à 2,5 D.

Désignation

Exemple : TUBE 12 X 16 EZ

- Désignation
- Diamètre intérieur
- Diamètre extérieur (D)
- Particularité du tube

(voir paragraphe « Types »)

Types

Classique : tous les tubes (sauf EZ et inox) ont les surfaces intérieures et extérieures recouvertes d'un film d'huile.

Renforcé : désignation se terminant par "R", tubes dont la paroi est plus épaisse.

Electro-zingué : désignation se terminant par « EZ », la protection extérieure (10-12 μ) permet une utilisation immédiate du tube (sans peinture de protection préalable).

Le tube est reconnaissable à sa couleur blanc platine (directive européenne ELV2000/53/EC).

Inox : essentiellement utilisés pour les applications industrielles exigeantes (marine, agroalimentaire, ...).

Ils sont consultables dans notre catalogue Industrie.

Dimensions

Les tableaux dans ce présent catalogue indiquent les dimensions de tubes standards en stock.
Toutes autres dimensions et/ou qualités peuvent être fournies sur demande.

Contrôles

Tous les tubes subissent systématiquement :

- un contrôle non destructif aux courants de Foucault
- un contrôle visuel sur table de l'aspect extérieur du tube

Longueurs stockées

Les tubes sont stockés en longueur de 6 mètres (norme : 0/+10 mm) et bouchonnés (bouchons plastiques) à chaque extrémité.

Marquage

Les tubes sont marqués longitudinalement en continu à l'encre, selon les prescriptions des normes.

Certificat

Sur demande, le produit est accompagné d'un certificat précisant la composition chimique et les résultats des essais mécaniques des tubes.

L'écrou de rail **ER 06 (ZFR012316)** est identique pour tous les modules de 1 à 6.

Rail de fixation livré en longueur indivisible de 2 mètres et proposé en différentes hauteurs :

- RAIL MODULE 1 (ZFR012313) H=11 mm
- RAIL MODULE 2 (ZFR012314) H=14 mm
- RAIL MODULE 3 (ZFR012315) H=30 mm

Lors de la prise de commande, veuillez indiquer la référence ou le code informatique et ses quantités.

Rail nut ER 06 (ZFR012316) is identical for all modules between 1 to 6.

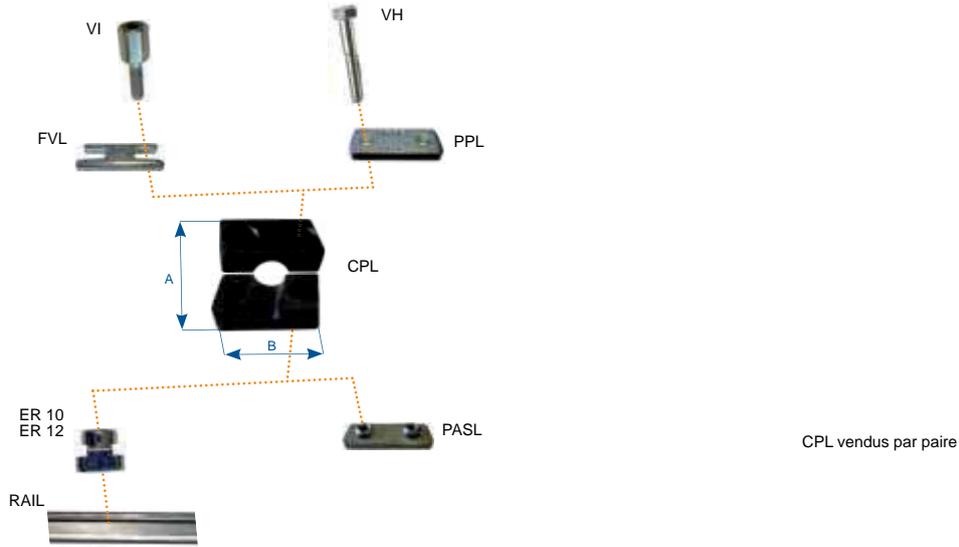

Base rail is delivered in 2 meter lengths only and suggested in different heights :

- RAIL MODULE 1 (ZFR012313) H=11 mm
- RAIL MODULE 2 (ZFR012314) H=14 mm
- RAIL MODULE 3 (ZFR012315) H=30 mm

Please state reference or computer code and desired quantities when ordering.

COLLIERS DOUBLES

La référence de l'écrou de rail est **ER 06 (ZFR012316)** pour le module 1 et **ER 08 (ZFR022369)** pour les modules 2 à 5.

Rail de fixation livré en longueur indivisible de 2 mètres et proposé en différentes longueurs :

- RAIL MODULE 1 (ZFR012313) H=11 mm
- RAIL MODULE 2 (ZFR012314) H=14 mm
- RAIL MODULE 3 (ZFR012315) H=30 mm

Lors de la prise de commande, veuillez indiquer la référence ou le code informatique et ses quantités

Reference of rail nut is **ER 06 (ZFR012316)** for module 1 and **ER 08 (ZFR022369)** between modules 2 to 5.

Base rail is delivered in 2 meter lengths only and suggested in different heights :

- RAIL MODULE 1 (ZFR012313) H=11 mm
- RAIL MODULE 2 (ZFR012314) H=14 mm
- RAIL MODULE 3 (ZFR012315) H=30 mm

Please state reference or computer code and desired quantities when ordering
